## R&D PRODUCT ENGINEER | SOFTWARE ENGINEER

Amman, Jordan | +962 78 600 9370 | hashemkayyali99@gmail.com | linkedin.com/in/hashem-kayyali-a4852a2b7

### PROFESSIONAL SUMMARY

Product-minded Software Engineer and R&D Product Engineer with experience across web, desktop, cross-platform, automation, computer vision, embedded systems, connected products, technical operations, and customer-facing work. Builds products from requirements and interface design through implementation, hardware integration, testing, troubleshooting, and deployment preparation.

### PROFESSIONAL EXPERIENCE

- R&D Product Engineer | Software & Connected-System Portfolio** | Amman, Jordan **Aug 2026 - Present**  
Lead end-to-end web, desktop, mobile, automation, computer-vision, and IoT products, owning requirements, UX, APIs, data, firmware, integration, testing, and deployment preparation.  
Build React, Next.js, Flutter, .NET, Python, and ESP32 solutions using sensors, NFC, BLE, WebSocket, UDP, and real-time communication.
- Career Progression | The Terminal VR** | Jordan | Hybrid **Jan 2025 - Jul 2025**  
Started as Sales Representative (Jan 2025 - Feb 2025), engaging customers and developing strong product and operations knowledge; promoted after one month to Technical Operations Engineer (Feb 2025 - Jul 2025).  
Supported installation, networking, systems integration, hardware diagnostics, maintenance, and software troubleshooting, later managing day-to-day technical operations from a dedicated office.
- Youth Unit Operations Team Member | Umniah** | Amman, Jordan | Part-time **Mar 2024 - Jan 2025**  
Promoted internet and mobile subscriptions, assessed customer needs, recommended suitable services, worked toward sales targets, and handled inquiries and post-sale follow-up.

### TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Dart, C#, Python, Embedded C++  
**Web & Cross-Platform:** Next.js, React, Tailwind CSS, Flutter, React Native, WPF, Android Studio  
**Backend & Data:** .NET Web API, REST APIs, Supabase, PostgreSQL, SQL, WebSocket  
**Embedded & Applied:** ESP32 / ESP32-S3, BLE, NFC, Hall sensors, MPU6050, WS2812B, Wi-Fi, UDP, Serial, KiCad, OpenCV

### SELECTED PROJECTS

- Eventies & Glitzz Lab:** Bilingual web platforms for event-service discovery, bookings, requests, customer workflows, and owner operations.
- Umniah YouthConnect:** Flutter and Supabase internal operations platform with member workflows, role-based leader dashboard, reporting, and Excel export.
- Basket Beats:** Interactive IoT basketball system with ESP32 sensor bases, real-time scoring, LED feedback, reports, and Flutter Windows control.
- The Terminal NFC:** Client-server NFC point-of-sale system with WPF applications, account verification, centralized transactions, and a .NET API.

### EDUCATION & PROFESSIONAL FOCUS

Bachelor-level studies in Software Engineering (in progress). Target roles: Software Engineer, R&D Product Engineer, Full-Stack Developer, Mobile Developer, and IoT Developer.
