CURRICULUM VITAE

HASHEM KAYYALI

R&D Product Engineer | Software Engineer

AMMAN, JORDAN

Embedded Systems & Firmware / IoT & Connected Products / Hardware–Software Integration / Mobile & Full-Stack Development / System Architecture & Integration

hashemkayyali99@gmail.com / +962 78 600 9370 / hashemkayyali.com / linkedin.com/in/hashem-kayyali

01 PROFESSIONAL PROFILE

R&D Product Engineer and Software Engineer who builds products across software, embedded systems, IoT and hardware–software integration — web, mobile, desktop, automation and connected systems — from requirements and system design through firmware, integration and deployment. Co-founder and Technical Lead of Eventies.

02 PROFESSIONAL EXPERIENCE

Technical Lead

Eventies · Part-time · Remote · Jan 2026 – Present · Amman, Jordan

- Co-founded Eventies and leads hands-on technical development, shaping product direction and engineering decisions.
- Scope: product planning, system architecture, user experience, frontend and backend development, integrations and deployment.

R&D Product Engineer & Software Engineer

Independent R&D / Software Engineering · Self-employed · On-site · Aug 2025 – Present · Amman, Jordan

- Develops complete products across R&D, software engineering, embedded systems and hardware–software integration, from early concepts through implementation, testing and deployment, spanning web, mobile, desktop, controllers, sensors and automation.

The Terminal VR

Jan 2025 – Present · Amman, Jordan

Technical Training Lead — Software & VR Content

Freelance · Hybrid · Jul 2025 – Present · Amman, Jordan

- Led practical technical training for university students completing field training: software development workflows, VR content creation, progress reviews and project deliverables.

Technical Operations Engineer

Full-time · Hybrid · Feb 2025 – Jul 2025 · Amman, Jordan

- Managed daily technical operations for VR systems, computers, networking and connected hardware: installation, configuration, troubleshooting, updates, maintenance and system reliability.

Sales

Full-time · On-site · Jan 2025 – Feb 2025 · Amman, Jordan

- Customer-facing sales role supporting customers and daily venue operations.

Youth Unit Operations Team Member

Umniah · Part-time · Hybrid · Mar 2024 – Jan 2025 · Amman, Jordan

- Customer engagement and telecommunications service sales, meeting individual and team targets, follow-up and collaboration with marketing colleagues.

03 TECHNICAL EXPERTISE

HARDWARE & EMBEDDED	Microcontrollers (ESP32 & ESP8266), Embedded C++, BLE, NFC, Wi-Fi, Real-Time Communication, PCB Design, Custom Hardware Development
MOBILE & CROSS-PLATFORM	Flutter, Dart, React Native, Android Studio, Cross-Platform Development
WEB & FRONTEND	Next.js, React, TypeScript, JavaScript, Tailwind CSS, Responsive UI
BACKEND & DATA	C#, WPF, .NET Web API, REST APIs, Supabase, PostgreSQL, SQL, WebSocket
AUTOMATION & APPLIED ENGINEERING	Python, OpenCV, Computer Vision, Email Automation, Excel / CSV Processing

04 EDUCATION

Amman Arab University

Bachelor's Degree in Computer Software Engineering

Oct 2021 – Sep 2026 · Graduated

06 PROJECT PORTFOLIO

Eventies

LIVE · ACTIVE DEVELOPMENT

An event-services marketplace bringing rentals, production, activations, entertainment and custom solutions into one catalog, with a customer request journey and an internal handling workflow.

Next.js · TypeScript · Supabase

Glitzz Lab

LIVE

A graduation and wedding service website linking service exploration and customer requests to internal workflows, with automated customer and operational messaging via Meta WhatsApp.

Next.js · TypeScript · Supabase · Meta WhatsApp Integration

Umniah YouthConnect

INTERNAL OPERATIONS PLATFORM · PRIVATE

Mobile workflows for members (availability, shifts, support, submissions) and dashboards for authorized leaders (reporting, analytics, reviews, exports) on shared data with role-based access.

Flutter · Dart · Supabase

The Terminal Simulator Control

UNDER DEVELOPMENT · PRIVATE

A simulator control system: RFID card authorization, a Windows client recording game sessions on each simulator, paired motion sensors for monitoring and calibration, and a central dashboard.

C# · WPF · Supabase · RFID · Motion sensors

06 PROJECT PORTFOLIO (CONTINUED)

Bike Tower

PRIVATE R&D PROJECT

A real-time multiplayer cycling installation: ESP32-S3 controllers process pedaling locally while a Flutter controller coordinates bikes, games such as Tug of War, and live LED feedback.

Flutter · Dart · ESP32-S3 · Embedded C++ · WebSockets · UDP · Custom PCB · LED control

Basket Beats

PRIVATE R&D PROJECT

A connected basketball game that senses impacts at several bases, filters noise in embedded firmware, and sends scoring events to a central controller coordinating game modes and feedback.

Flutter · Dart · Embedded C++ · Sensors · WebSockets · UDP · Custom PCB

VR Cycling

PROTOTYPE · PRIVATE

An immersive cycling prototype in which a real exercise bike is the game controller: embedded firmware turns pedaling into riding input that drives movement and speed inside the virtual world.

Microcontrollers · Embedded C++ · Custom PCB · Hardware–software integration

Bike-Land Smart Cycling Trainer

COMPLETED · PRIVATE

A smart cycling trainer that turns bicycle movement into live speed, cadence and distance using sensors and custom firmware, and connects those metrics to training software and interactive applications.

Microcontrollers · Embedded C++ · Sensors · Custom PCB · Hardware–software integration

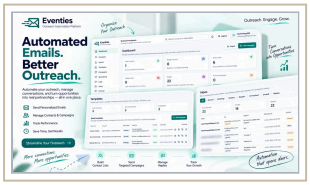

Financial Operations & Accounting System

PRIVATE PROJECT

A business accounting system with double-entry bookkeeping, ledger and trial balance, partner balances, expenses, inventory, reconciliation, reporting and traceable, auditable reversals.

React · TypeScript · Supabase · PostgreSQL · Tailwind CSS · Recharts

Outreach Automation Platform

PRIVATE PROJECT

An outreach workflow for contacts and personalized email campaigns from reusable templates, with controlled sending queues, delivery tracking and reply synchronization into one history.

Next.js · React · TypeScript · Supabase · PostgreSQL · SMTP/IMAP

Traffic Flow Analytics Studio

PROTOTYPE · PRIVATE

A desktop prototype that converts recorded traffic footage into tracked vehicle movements via detection, multi-object tracking and counting lines, with annotated video and CSV/Excel exports.

Python · PySide6 · OpenCV · YOLOv8 · BoT-SORT
